Cost of acquisition of fixed assets is inclusive of all incidental expenses relating to cost of acquisition and the cost of installation / erection as applicable. Borrowing cost related to acquisition or construction of those fixed asset which necessarily take a substantially period of time to get ready for their intended use are capitalised.

Depreciation on fixed assets is provided on Straight line method. The rates of depreciation prescribed in Schedule II to the Companies Act, 2013 are considered as the minimum rates. If the management's estimates of the useful life of a fixed asset at the time of acquisition of the asset or of the remaining useful life on a subsequent review is shorter than that envisaged in the aforesaid Schedule, depreciation is provided at a higher rate based on the management estimate of useful life/ remaining useful life.

Intangible assets and amortization

Intangible assets are recorded at the consideration paid for acquisition. Intangible assets are amortized over their estimated economic useful lives on a straight line basis commencing from the date the asset is available for its use.

d Inventories

Inventories are valued at the lower of cost and net realizable value.

Cost of inventories comprises all cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost includes all taxes and duties, but excludes duties and taxes that are subsequently recoverable from tax authorities.

e Leases

Operating lease payments are recognised as an expense in the statement of profit and loss account on straight line basis over the lease term.

Assets acquired under a finance lease are capitalised and the corresponding lease liability is recorded at an amount equal to the fair value of the leased asset or the present value of the minimum lease payments, whichever is lower, at the inception of the lease. Lease payments are apportioned between finance charges and reduction of the lease liability at the implicit rate of return. Finance charges are charged to statement of profit and loss account.

f Revenue recognition

Income from Training Services is accounted when the relevant services are rendered and is net of discounts and taxes and Income from Sale of Software is accounted on transfer of ownership

g Investments

Long term investments are stated at cost and provisions recorded to recognize any decline, other than temporary, in the carrying value of each investment.

Current investments are stated at lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investments.

h Employee benefit

Defined contribution plan

At present the company has no obligation to provide for contribution towards PF/ ESI and gratuity

i Foreign currency transactions

Transactions in foreign currencies are recorded at the exchange rates prevailing on the date of the transactions or rates that approximates the exchange rate prevailing at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the closing exchange rates on that date. Exchange differences arising on foreign exchange transactions during the year and on restatement of monetary assets and liabilities are recognized in the statement of profit and loss account of the year.

j Provisions, contingent liabilities and contingent assets

The Company creates a provision when there is present obligation as a result of past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Contingent assets are neither recognised nor disclosed in the financial statements.

k Taxation

Income tax expenses comprise current tax (i.e. amount of income tax for the year determined in accordance with the Income Tax law) and deferred tax charge or credit (reflecting the tax effects of the timing differences between the accounting income / expense and taxable income / expense for the year). The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty of the assets getting realised in future. However, where there is unabsorbed depreciation or carry forward of losses under taxation laws, deferred tax assets are recognized only if there is virtual certainty of realization of such assets. Deferred tax assets are reviewed at each balance sheet date and written down or written up to reflect the amount that is reasonable / virtually certain (as the case may be) to be realised.

Current tax and deferred tax assets and liabilities are offset to the extent to which the Company has a legally enforceable right to setoff and they relate to taxes on income levied by the same governing taxation laws.

l Earnings per share

Basic earnings per share is computed by dividing net profit or loss for the period attributable to equity shareholders by the weighted average number of shares outstanding during the year. Diluted earnings per share amounts are computed after adjusting the effects of all dilutive potential equity shares. The number of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share, and also the weighted average number of equity shares, which could have been issued on the conversion of all dilutive potential shares. The diluted potential equity shares are adjusted for the proceeds receivable, had the shares been actually issued at fair value (i.e. the average market value of the outstanding shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date.

m Impairment policy

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount (higher of net realizable value and value in use) of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than the carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the statement of profit and loss account. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciable historical cost.

n Cash flows

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, financing and investing activities of the Company are segregated. Cash flows in foreign currencies are accounted at average monthly exchange rates that approximate the actual rates of exchange prevailing at the dates of the transactions.
